

A man and a young girl are having a playful pillow fight on a bed. The man is lying on his back, and the girl is standing over him, hitting him with a large white pillow. Both are smiling and laughing. The bed is covered with white linens, and the background is a plain, light-colored wall.

Pillows*

Our History

The story of Leirispumas began modestly, in a small warehouse in Agodim de Cima, Leiria, Portugal. It was here that, on July 15, 1992, Adriano Costa and Alice Santos founded the company, initially focusing on the disintegration of foam to create pillows and sofas based on foam flakes. Soon, we began selling pillows to large national distributors.

In 1999, we built our first warehouses, doubling the covered area and investing in specialized machinery. This growth allowed us to diversify our business, entering the decoration sector with the production of poufs. With the expansion of our customer base, we expanded our facilities again in 2014, tripling the production area to better meet market demands.

In 2016, we ventured into the digital world, launching online stores for our brands Leirispumas, Fushia Medical Care and Softcurve. In 2020, we expanded our presence in international e-commerce, joining the major global online sales platforms. Today, Leirispumas remains committed to innovation and quality, offering a wide range of products to meet the needs of our customers.

Foam Flakes

Main features

Our foam flakes are manufactured from virgin polyurethane foam scraps, carefully selected and blended to ensure the highest quality. This rigorous selection process ensures that the best materials are used, resulting in a highly durable filling. The combination of foam flakes provides a firm and comfortable feel, ideal for applications that require robust support and consistency over time. This type of filling, in addition to its durability and longevity, maintains its shape and functionality, even with frequent use, thus ensuring user satisfaction.

Hygiene

Our foam flakes are distinguished by the fact that we only use carefully selected virgin foam scraps. We also only use foams certified by OEKO-TEX® STANDARD 100, Class 1, which guarantees that they comply with strict health and safety standards. This certification confirms that the flakes are safe for direct contact with the skin, making them suitable for products intended for babies and children. Our pillows, made with classic or viscoelastic foam flakes, have the advantage of being machine washable and dryable.

Eco-friendly pillows

An effective solution to reduce waste in the mattress and furniture industry is to recycle leftover foam into new, high-quality products. This process diverts around 600 grams of leftover foam per pillow from landfills, thus contributing to protecting the environment and reducing the need for new raw materials.

Basic Pillow

General Description:Low, medium-comfort pillow, perfect for those looking for softness and good support. Ideal for a comfortable and relaxing night's sleep.

Filling/Core:100% low density foam flakes, OEKO-TEX STANDARD 100, Class 1 certified, offering a lightweight and high quality material.

Cover/Cover:30 g/m² non-woven fabric (TNT), made from 100% polypropylene, and also OEKO-TEX STANDARD 100, Class 1 certified, ensuring a resistant and soft-touch covering.

Packaging:The product is packaged in a polypropylene (PP) bag with handle, and includes a self-adhesive leaflet with additional information about the product.

White Pillow

General Description:Firm pillow, with medium height, ideal for those who prefer good support while sleeping, combining firmness and comfort for a refreshing night's rest.

Filling/Core:Two layers of 5 mm foam, plus 100% medium density polyurethane foam flakes, certified OEKO-TEX STANDARD 100, Class 1, ensuring firm and durable support.

Cover/Cover:100 g/m² microfiber fabric, made from 100% polyester, and OEKO-TEX STANDARD 100, Class 1 certified, providing softness and resistance.

Packaging:The product is packaged in a polypropylene (PP) bag with handle, and includes a self-adhesive leaflet with additional information about the product.

Memory Foam Pillow

General Description:High pillow with intermediate firmness, ideal for those looking for a good balance between support and comfort. Its combination of memory foam and polyurethane offers a personalized sleeping experience, relieving pressure points and ensuring a comfortable position.

Filling/Core:Two layers of 5mm foam, combined with 80% memory foam flakes and 20% medium density polyurethane foam flakes. All materials are OEKO-TEX STANDARD 100, Class 1 certified.

Cover/Cover:140 g/m² polyester mesh, known for its great softness, and certified OEKO-TEX STANDARD 100, Class 1, offering a pleasant touch throughout the night.

Packaging:The product is packaged in a polypropylene (PP) bag with handle, and includes a self-adhesive leaflet with additional information about the product.

Fibers
Synthetics

Polyester Fiber

Fiber Pillow

General Description: Soft and welcoming pillow with an excellent balance between comfort and support. The virgin polyester fiber offers a soft feel and durability, making it ideal for a relaxing and restorative rest.

Filling/Core: 100% virgin polyester fiber, certified OEKO-TEX STANDARD 100, Class 1, guaranteeing a high quality, resistant and comfortable material.

Cover/Cover:

- **Option 1:** 100 g/m² microfiber fabric, made from 100% polyester, OEKO-TEX STANDARD 100, Class 1 certified, providing a soft and smooth touch to the skin.
- **Option 2:** 100% cotton fabric weighing 130 g/m², with OEKO-TEX STANDARD 100, Class 1 certification, offering a natural and breathable cover, ideal for those seeking freshness and comfort.

Packaging: The product is packaged in a polypropylene (PP) bag with handle, accompanied by a self-adhesive leaflet with additional information about the product.

100% Polyester Filling Fiber: Comfort and Safety

Our 100% polyester filling fibre offers the perfect combination of softness, adaptability and safety. Certified by OEKO-TEX® STANDARD 100, Class 1, this fibre ensures quality and safety for products, providing exceptional comfort and a perfect fit. In addition, it is free from recycled materials or resin coatings, ensuring a soft and safe touch. Ideal for those looking for high-quality, comfortable and safe products for everyday use.

Cotton Lining:

Our pillow with 100% polyester filling can be covered with cotton fabric, providing a natural and soft comfort experience. Cotton is a natural, breathable and lightweight fiber that guarantees freshness and comfort throughout the night. In addition, it is hypoallergenic, ideal for sensitive skin, and offers a soft and pleasant touch. Choosing a cotton covering means opting for a soft, durable and easy-care material, combining the best of both worlds: comfort and functionality in every detail.

Microfiber Polyester

Hotel Pillow

General Description: Low and extra soft pillow, ideal for those seeking luxurious comfort and a pleasant night's sleep. With highly soft microfiber filling, it offers high-quality rest and a soft touch throughout the night.

Filling/Core: 100% highly soft virgin microfiber, certified OEKO-TEX STANDARD 100, Class 1, providing comfortable and skin-safe material.

Cover/Cover: 100 g/m² microfiber fabric, made from 100% polyester, with OEKO-TEX STANDARD 100, Class 1 certification, ensuring a soft and refreshing touch.

Packaging: The product is packaged in a polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Premium Hotel Pillow

General Description: High and extra soft pillow, offering superior comfort with excellent support. Ideal for those seeking a luxurious rest, providing pleasant and refreshing nights of sleep.

Filling/Core: 100% highly soft virgin microfiber, certified OEKO-TEX STANDARD 100, Class 1, guaranteeing exceptional quality and comfort.

Cover/Cover: 100 g/m² microfiber fabric, made from 100% polyester, with double passe-poil finish, OEKO-TEX STANDARD 100, Class 1 certified.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

100% Polyester Filling Fiber: Comfort and Safety

Our 100% polyester filling fibre offers the perfect combination of softness, adaptability and safety. Certified by OEKO-TEX® STANDARD 100, Class 1, this fibre ensures quality and safety for products, providing exceptional comfort and a perfect fit. In addition, it is free from recycled materials or resin coatings, ensuring a soft and safe touch. Ideal for those looking for high-quality, comfortable and safe products for everyday use.

Polyester Technology “Cold Thread”

Fresh Pillow

General Description:Cooling pillow, designed to ensure a light and comfortable rest with a feeling of freshness throughout the night. Ideal for those looking to keep their head and neck cool, providing a refreshing sleep experience.

Filling/Core:100% virgin polyester fiber, certified OEKO-TEX STANDARD 100, Class 1, guaranteeing a high quality, comfortable and long-lasting material.

Cover/Cover:200 g/m² knitted fabric, made from 100% Cool Fiber polyester, OEKO-TEX STANDARD 100, Class 1 certified, offering a soft, breathable and refreshing cover.

Packaging:The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Fresh Premium Pillow

General Description:Superior comfort pillow, designed to provide a feeling of freshness throughout the night. The Cool Fiber fabric cover contributes to a cool and breathable touch. Ideal for those looking for cooler and more peaceful nights.

Filling/Core:100% virgin polyester fiber, certified OEKO-TEX STANDARD 100, Class 1, guaranteeing a high quality, comfortable and long-lasting material.

Cover/Cover:200 g/m² knitted fabric, made from 100% Cool Fiber polyester, with double passepoil in light blue satin and OEKO-TEX STANDARD 100, Class 1 certified, offering freshness, softness and durability.

Packaging:The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Polyester “Cold Yarn” Technology: Comfort and Freshness

The Pillow with a polyester covering using "Cool Yarn" technology offers a unique experience of freshness and comfort. This innovative fabric keeps the surface of the Pillow cool and pleasant, even in hot environments, thanks to its excellent thermal control and high breathability. The cool yarn polyester dries quickly, making it easy to maintain and preventing odours, while its durability ensures constant, quality support. Perfect for those looking for comfort and thermal regulation in any season or climate.

Monoblock Foam

Memory foam, or viscoelastic foam, was a technological innovation that emerged in the 1960s. It was initially developed by NASA to absorb shock and provide comfort in spacecraft seats and seat belts. Its ability to absorb impact and relieve pressure represented a major breakthrough in the aerospace industry, before expanding to helmets and shoes.

In the 1990s, memory foam gained popularity in the pillow and mattress markets. Although it promised a more comfortable and restful sleep, early models had some drawbacks, such as excessive heat retention, a "blocked" feeling and considerable weight.

Today, technology has evolved considerably. We have perfected memory foam to address these shortcomings. Our range of memory foam pillows is a perfect example of this. We only use the highest-quality memory foams, designed to provide the ideal balance between lightness and comfort. Each pillow adapts perfectly to your body, providing exceptional support and an unparalleled sleeping experience.

Discover the difference with our memory foam and reach a new level of comfort and well-being.

Anatomical Pillow

General Description: Anatomical pillow designed to provide optimal support for the head and neck, helping to maintain the correct posture during sleep. The graphene memory foam adapts perfectly to the contours of the body, providing personalized comfort and deep rest.

Filling/Core: 100% graphene viscoelastic foam in monobloc polyurethane, certified OEKO-TEX STANDARD 100, Class 1, ensuring a combination of firm support and pressure relief.

Cover/Cover: 140 g/m² knitted fabric made from 100% polyester, OEKO-TEX STANDARD 100, Class 1 certified, offering softness and durability.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Monoblock Pillow

General Description: Innovative pillow designed with graphene viscoelastic technology, providing excellent support and adaptability to the shape of the body. Ideal for those looking for a high level of comfort and pressure relief, ensuring a restful sleep.

Filling/Core: 100% graphene viscoelastic foam in monobloc polyurethane, certified OEKO-TEX STANDARD 100, Class 1, offering durable, high-quality support.

Cover/Cover: 140 gsm knitted fabric made from 100% polyester on the top and light grey velvet on the sides, also made from 100% polyester. Both materials are OEKO-TEX STANDARD 100, Class 1 certified, ensuring durability and softness.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Backrest Pillow

General Description: Ideal for providing support and comfort during long periods of rest or work. With a simple and practical design, it offers efficient support and is ideal for use on chairs, sofas or to support posture.

Filling/Core: 100% monoblock polyurethane foam, certified OEKO-TEX STANDARD 100, Class 1, ensuring a durable and safe material.

Cover/Cover: 200 g/m² knitted fabric, made from 100% polyester, OEKO-TEX STANDARD 100, Class 1 certified, offering resistance and comfort.

Packaging: The product is packaged in a polypropylene (PP) bag and includes a self-adhesive leaflet with additional information about the product.

***Fibers
Natural***

Kapok

Kapok Pillow

General Description:Low pillow, ideal for those who prefer more discreet support and an intermediate comfort experience. Offers gentle support, maintaining a balance between softness and support.

Filling/Core:100% kapok fibers from Indonesia, providing a lightweight and durable filling.

Cover/Cover:100% cotton fabric with a weight of 130 g/m², OEKO-TEX STANDARD 100, Class 1 certified.

Packaging:The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Premium Kapok Pillow

General Description:High pillow with intermediate comfort, ideal for providing balanced support and a pleasant sensation while sleeping.

Filling/Core:100% kapok fibers from Indonesia, offering a lightweight and durable filling.

Cover/Cover:100% cotton fabric with a weight of 130 g/m² and double piping finish, OEKO-TEX STANDARD 100, Class 1 certified.

Packaging:The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Sustainable Comfort and Respect for the Environment

Kapok is an ecological and environmentally friendly choice, extracted from the *Ceiba pentandra* tree, grown on non-agricultural land, with a 100% positive environmental impact. By choosing kapok-based products, you are actively contributing to the preservation of the environment. In addition, kapok offers a unique combination of lightness, comfort and thermal insulation, making it ideal for pillows, mattresses and other products. This natural fibre combines functionality, durability and respect for nature, making it a conscious and sustainable choice for everyday life.

Lyocell

Lyocell Pillow

General Description: Low pillow with firm comfort, ideal for those looking for consistent and stable support during sleep. Provides adequate support to maintain the correct position of the head and neck, without losing softness.

Filling/Core: 100% lyocell fibers, derived from eucalyptus, oak, bamboo and birch, ensuring an ecological and high quality material.

Cover/Cover: 100% cotton fabric with a weight of 130 g/m², OEKO-TEX STANDARD 100, Class 1 certified.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Premium Lyocell Pillow

General Description: High pillow with firm comfort, ideal for those looking for robust and consistent support, ensuring good posture while sleeping. Provides perfect support for those who prefer higher pillows, without compromising quality.

Filling/Core: 100% lyocell fibers, from eucalyptus, oak, bamboo and birch, offering an ecological and high quality material.

Cover/Cover: 100% cotton fabric with a weight of 130 g/m² and double piping finish, OEKO-TEX STANDARD 100, Class 1 certified.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Comfort and Sustainability from Nature

Lyocell is an eco-friendly and sustainable fiber made from responsibly sourced wood such as eucalyptus, oak, bamboo and birch. The production process uses solvent recycling technology, which minimizes environmental impact and makes this material an environmentally friendly choice. In addition to its reduced ecological footprint, Lyocell stands out for its softness, breathability and excellent moisture absorption. Ideal for clothing, sheets and other fabrics, it offers superior comfort while promoting the preservation of nature.

Bamboo

Bamboo Pillow

General Description: Low pillow with intermediate comfort, specially designed for those who prefer more delicate support. It offers a balanced soft sensation with adequate support, being ideal for those who sleep lightly and seek more comfort without exaggerating the height.

Filling/Core: 100% bamboo fibers, ensuring an ecological and high quality material.

Cover/Cover: 100% cotton fabric with a weight of 130 g/m², OEKO-TEX STANDARD 100, Class 1 certified.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Premium Bamboo Pillow

General Description: High pillow with intermediate comfort, ideal for those looking for higher and more balanced support. It offers a good combination of softness and firmness, providing the necessary support throughout the night in a comfortable way.

Filling/Core: 100% bamboo fibers, ensuring an ecological and high quality material.

Cover/Cover: 100% cotton fabric with a weight of 130 g/m², embroidered with double brown piping, OEKO-TEX STANDARD 100, Class 1 certified.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Sustainability and Natural Comfort

Bamboo is a renewable natural fibre, increasingly appreciated for its ecological qualities. Flexible and lightweight, it is naturally antibacterial and hypoallergenic, making it ideal for bedding and comfort products. With thermoregulatory properties, it maintains a pleasant temperature all year round, providing freshness in summer and warmth in winter. In addition, bamboo is breathable, absorbs moisture and dries quickly, ensuring continuous comfort and well-being. Its production has a low environmental impact, as bamboo grows quickly without the need for pesticides, making it a conscious choice for those looking to combine sustainability and comfort. Choosing bamboo means opting for a durable, soft and naturally pleasant solution for your everyday life.

Merino Wool

Wool Pillow

General Description: Low-height, firm-comfort pillow, ideal for those looking for stable, natural support. Portuguese sheep's wool provides a pleasant welcome while ensuring the support needed for a restful, healthy sleep.

Filling/Core: 100% Portuguese sheep's wool, providing a high-quality, naturally-derived filling with breathable and thermal properties.

Cover/Cover: 100% cotton fabric with a weight of 400 g/m², OEKO-TEX STANDARD 100, Class 1 certified, offering superior durability and comfort.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Premium Wool Pillow

General Description: High pillow with firm comfort, perfect for those looking for robust and cozy support. The combination of Portuguese sheep's wool and the structured design ensures proper posture during sleep, while providing a soft and natural touch.

Filling/Core: 100% Portuguese sheep's wool, offering a high-quality natural filling, with excellent thermal regulation and breathable properties.

Cover/Cover: 100% cotton fabric with a weight of 400 g/m² and double passe-poil finish, OEKO-TEX STANDARD 100, Class 1 certified, guaranteeing softness and durability.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, and includes a self-adhesive leaflet with additional information about the product.

Natural Softness and Sustainability

Portuguese Merino Wool is a natural fibre of excellence, originating from the plains of Alto Alentejo, standing out for its softness and ability to regulate temperature. Ideal for Pillows, bedspreads and clothing, it is carefully selected, washed, weighed and treated with antibacterial and anti-feutraging processes. Committed to animal welfare, we avoid mulesing practices, ensuring ethical production. When you choose Portuguese Merino Wool, you opt for luxurious and durable comfort, providing pleasant and sustainable nights of sleep.

Feathers

Feathers Pillow

General Description:Low Pillow with a soft texture, designed to provide a touch of luxury and unparalleled comfort. Made with high-quality feathers, this Pillow offers an enveloping and sophisticated feel, perfect for those who appreciate premium products.

Filling/Core:100% ethically harvested down feathers, ensuring a light, natural and extremely long-lasting filling, enhancing the luxurious character of the product.

Cover/Cover:100% cotton fabric with a weight of 130 g/m², OEKO-TEX STANDARD 100, Class 1 certified, providing softness, breathability and superior quality.

Packaging:The product is packaged in a sewn polypropylene (PP) bag with piping and handle, accompanied by a self-adhesive leaflet with detailed information about the product.

Feathers Premium Pillow

General Description:High pillow with luxurious softness, ideal for those looking for high comfort combined with a sophisticated design. The feather filling offers a superior level of softness and lightness, providing a restful sleep and a unique well-being experience.

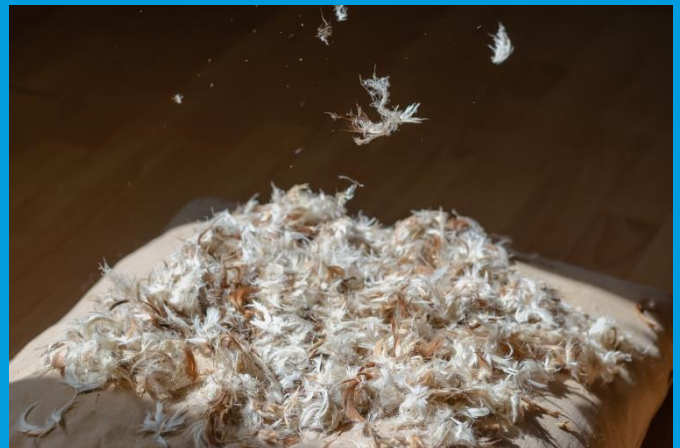

Filling/Core:100% ethically harvested down feathers, ensuring a lightweight, long-lasting and natural filling that reflects the premium quality of the product.

Cover/Cover:100% cotton fabric with a weight of 130 g/m² and finished with a double brown passe-poil, OEKO-TEX STANDARD 100, Class 1 certified, combining resistance and a soft touch.

Packaging:The product is packaged in a sewn polypropylene (PP) bag with piping and handle, accompanied by a self-adhesive leaflet with detailed information about the product.

Ethical Comfort with Goose Down

Goose down is synonymous with comfort and luxury, ideal for pillows, duvets and premium bedding products. Renowned for its unparalleled lightness and excellent thermal insulation properties, it guarantees warmth on cold nights and freshness in warmer seasons. Our goose down is ethically sourced through responsible processes that respect animal welfare, without resorting to the extraction of feathers from live birds. By choosing products with carefully selected goose down, you are choosing durable and sustainable comfort, aligned with conscious and responsible practices.

Goose Down

Goose Down Pillow

General Description: Low and extra soft pillow, perfect for those seeking a touch of luxury and exceptional softness. Ideal for providing a delicate rest, with gentle support that adapts naturally to individual preferences.

Filling/Core: 100% ethically harvested goose down, ensuring a lightweight, comfortable and high-quality filling with a uniquely soft feel.

Cover/Cover: 100% cotton fabric with a weight of 400 g/m², OEKO-TEX STANDARD CLASS 1 certified, ensuring durability and safety, even for sensitive skin.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, accompanied by a self-adhesive leaflet with detailed information about the product.

Premium Goose Down Pillow

General Description: High and extra soft pillow, ideal for those who value luxury, extreme comfort and a sophisticated touch. It offers light and enveloping support, perfect for a relaxing and restful sleep.

Filling/Core: 100% Goose Down, ethically harvested, ensuring a lightweight, comfortable and superior quality filling.

Cover/Cover: 100% cotton fabric with a weight of 400 g/m², finished with double grey passe-poil, OEKO-TEX STANDARD CLASS 1 certified, ensuring durability, softness and protection for all skin types.

Packaging: The product is packaged in a sewn polypropylene (PP) bag with piping and handle, accompanied by a self-adhesive leaflet with additional information about the product.

Natural Softness and Sustainability

Portuguese Merino Wool is a natural fibre of excellence, originating from the plains of Alto Alentejo, standing out for its softness and ability to regulate temperature. Ideal for Pillows, bedspreads and clothing, it is carefully selected, washed, weighed and treated with antibacterial and anti-feutraging processes. Committed to animal welfare, we avoid mulesing practices, ensuring ethical production. When you choose Portuguese Merino Wool, you opt for luxurious and durable comfort, providing pleasant and sustainable nights of sleep.

Aromatic

Lavender

Benefits for Sleep and Well-Being

Lavender is particularly effective for those who suffer from insomnia or have difficulty relaxing. Its presence in the sleeping environment, especially through aromatic pillows, helps induce sleep, providing a feeling of serenity and relaxation. Combining the fresh touch of lavender with the softness of the pillow fabric, your rest routine becomes more pleasant, relieving tension and promoting a truly restful night's sleep.

Calming Properties:

Lavender is widely recognized for its calming and relaxing properties and is often used in aromatherapy to reduce stress and anxiety. Its soft, enveloping aroma helps to calm the mind, providing an immediate relaxing effect. By using lavender scented pillows, you can create an ideal environment for rest, improving the quality of sleep and promoting a peaceful and restful sleep.

A Fresh Touch and Natural Comfort:

In addition to its relaxing effects, lavender also has natural deodorizing properties, making it ideal for keeping your sleeping environment fresh and pleasant. By using lavender scented pillows, you can add a touch of natural comfort to your space, benefiting not only from the calming aroma, but also from the feeling of freshness and well-being that the plant provides.

Eucalyptus

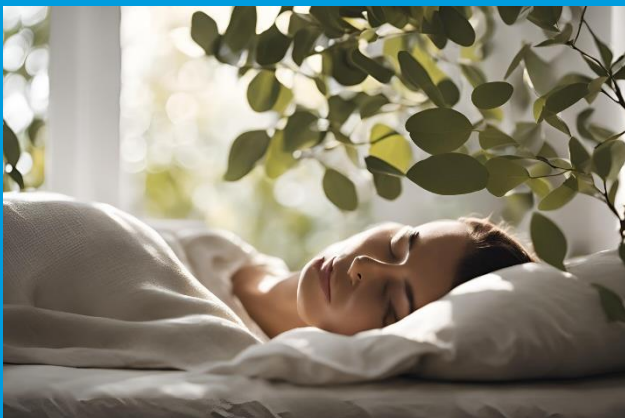

Environmental Purification and Well-Being

Eucalyptus is widely appreciated for its refreshing and revitalizing properties. Its strong, purifying aroma is ideal for creating more energizing and stimulating environments. Used in scented pillows, eucalyptus helps to purify the air and provide an immediate sensation of freshness, making it an excellent option for spaces such as living rooms or reading areas, where well-being is a priority.

Refreshing Properties

Eucalyptus is a powerful ally when the goal is to energize and refresh the environment. Its fresh and purifying aroma not only invigorates, but also brings an immediate sensation of freshness that transforms the space. By using eucalyptus scented pillows, your home will emit a pleasant and vibrant fragrance, creating a perfect environment for relaxation and productivity, whether in a living area or a corner dedicated to rest.

Benefits for Breathing and Respiratory Relief

The scent of eucalyptus is not only refreshing, but it also has a beneficial effect on the respiratory tract. With natural decongestant properties, it helps to relieve pressure in the sinuses and airways, providing a feeling of relief and freshness. By incorporating eucalyptus scented pillows into your routine, you can improve your breathing and create a healthy, comfortable environment, perfect for relaxing or sleeping better.

Rose

Purification and Harmony in the Environment:

Transform your space into a haven of tranquility with the delicate scent of roses. This soft and enchanting scent not only perfumes the environment, but also purifies the air, creating a fresh and welcoming atmosphere. By using rose scented Pillows, you are adding a touch of elegance and harmony to your space, bringing lightness and a sense of serenity that envelops your home with positive energy.

Relaxation and Well-Being:

Roses are known for their calming and relaxing properties. Their sweet, floral scent promotes a feeling of lightness, relieving stress and promoting emotional well-being. Rose scented pillows are perfect for creating a welcoming and peaceful environment, ideal for moments of rest or meditation. By incorporating this delicate aroma into your routine, you will provide yourself with a unique experience of serenity and calm, making your spaces more comfortable and balanced.

Benefits for the Soul and Body:

The scent of roses not only uplifts the environment, but also has a positive effect on the body and mind. The relaxing properties of roses help to relieve tension and create a state of inner harmony, promoting a sense of peace and well-being. By using rose scented pillows, you can enjoy the benefits of this fragrance for both emotional and physical relief, providing the perfect environment to relax, rest and rejuvenate.
